TL1216-2

The Resistence's leader Xanana Gusmão has done strike of alimentation since his judgement so far today.
What the reason?

The reason is the following:

1. The Resistence leader Xanana Gusmão made the strike to do not eat during three days because Xanana Gusmão has taken some information to be dead poisoned by Indonesian people. Now, Indonesia can't kill him directly because he was judged already with the punishment of perpetual prison.

2. However, there was and there is international reactions against the political position of indonesian government on the perpetual and unjust prison that they gave to Xanana Gusmão. The world consideres the perpetual prison as one forced condemnation. Indonesia thought that the international world had been quiet with the perpetual and ilegal prison of Xanana Gusmão. But, with the international reactions, Indonesia felt himself bored and weakened & weakened in political field about integration of East Timor into Indonesian Republic.

3. Indonesia tempts the manner to kill indirectly Xanana Gusmão through the poison which it goes to cause him the slow death. Those poisons are the acids, dedelés and other toxins that they accustomed to mix with the food or water to kill the political prisoners in the prison as they did to DOMINGOS SEIXAS to GASPAR GUSTAVO SIMÕES (died) son of JOSÉ SIMÕES, to MR Albino LURDES who suffered the terrible pain of abdominal cavity during six years. The IRC International Red Cross spent much money for his treatment, but, it continues still to ache there.

4. When they saw that the prisoners were very diseased or sick. they can't leave the diseased pri-

soners in prison. They decided to send them to the hospital. There, they combined or contacted with military male nurse and doctor to kill them one by one through the injections and medicaments and then they announced to the public or to his families that the political prisonnes were dead by the grave and incurable illness.

AS THE EXAMPLE AND EXPERIENCE

5. I, Domingos Saixas, had got 15 years imprisonment, I had Complished 4 years in East Timor's prison and I was banished to Cipinang prison with 11 years of punishment. It's the Central prison and first class in Indonesia. In that prison, I was atached by one grave sickness of ulcered stomach to have drunk the acid during the inquery in Dili, East Timor. I had been going to die in 1987 into the prison. Then, I went to be interned in hospital named KRAMATAT, in outside during two weeks. It's the POLICE HOSPITAL.

Certain day, one indonesian male nurse went to the infirmary where I was interned to give me injection. However, in the first injection was given by this male nurse, it provoked me the faint and the seat was swelled and felle of pain, because, when he came he went imediately to bathroom and he get out from there, he had prepared already the injection into the syringe with the colour of terremycyn because the doctor passed me injectable terremycyn. Therefore I suspected him that the injection was the urine of that male nurse.

The second injection, he made it the same and then I refused to take it. There, I was still feel pain my stomach, but, as I was afraid. I asked to the doct to give me soon the discharge from hospital and I came back to the prison.

6. Then, I came back from POLICE HOSPITAL to the prison. In the hospital prison, I met one political

man from Indonesia named Falua. He was the secretary of ex-governor of DKI-Jakarta. That ex-governor name Ali Sadikin. The man was very good for me. He told me about the cruel position of Soeharto's government. He said me, Soeharto is not popular for indonesian people. Soeharto is very dictator and ambitions. So the indonesian people is againsting his dictatorial regime

7. He was one indonesian man of political opposition, soon he was inimy of Soeharto. We were good friends on that occasion. Then, I told him all the torture and violations that the military forces had done to me and caused me the grave illness. He had been sorry with me and he sent his family to some medicine to cure my sickness and his sickness also. I told him the occured case with me in the POLICE HOSPITAL. He said me that all political prisoners must be very carefull with the men of Soeharto's government. They are very dangerous for us.

8. However, the doctor's prison saw that we were enemeed one another. He called me and he gave me order to get out from hospital or discharge from hospital to the block where my Timorese companions lived. The political man was transfered imediately to another prison in Java.

a. I was feeling myself a little better. I began already to move or to weave to clean our block and I brought the water to irrigate the garden.

b. Then, indonesian doctor named Lintong Napitu Pulu. He had some problem with other dentist doctor called Singgin, because this Singgin wanted to complain him to International Red Cross. He was afraid. Doctor Lintong wanted to get the simphaty from IRC. Pretended to call me to work Laboratorium in hospital prison, because there was not nobody who knew to make analyse of prisoners. He was afraid to send the prisoners to make the clinical examination in outside, because many criminal

prisoners fled themselves. So, he called me to work with him in clinical analyses. That doctor was of golkar party. He was responsible of a group of that party we worked with all animation.

c. One day, one of my Timorese friends was sick. He was named Manuel Victor. He was gravely sick we took him to the hospital and he had the consult with that doctor hintong. At the end, the doctor sent him to intern in the hospital of the prison. After that, the doctor sent him to police-hospital in outside for some days. However, there wasn't efficious treatment. The patient came back again to the hospital in the prison. His sickness became itself worse

d. Then, in a nice morning, when I went to work in laboratorium, I said to that indonesian doctor to pass one prescription and give it to Red Cross. hintong wanted to buy medicine from outside for my Timorese fellow who was sick. That doctor replied brutally that left to die my sick companion. He didn't import to treat him. I was very furious to that doctor.

e. In the afternoon, I came back to my block, it was faubled two days to have visits from international Red Cross. There, in my place, I began to prepare a letter to address to indonesian minister to discuss with I R C, I related all his misatitude during the period of time which I was there with him. I sent the letter to the indonesian ministers and I R C. They finished to discuss about him. At the end, the doctor was transfered from hospital of prison, in Cipinang. They put there other doctor to replace him. But, we continued to suspect because one doctor was going and other doctor was coming, There wasn't none difference. Then, we and International Red Cross decided to send back Manuel Victor with other friends to East Timor. There, he cured his illness with tradicional medicines. I also left to work and I avoided to go for the medical consult from indonesia until I came back to East Timor ~~March~~ of August 1991 and I was released on 23-11-1991, in Becora's prison, in Dili

9. The expressions on above mentioned of serving as examples which can happen for anybody. The frevented man avails two men. So xanana Gusmão is considered as the political and simbol lead of the Resistence of East Timor, he must seek to avoid all the manipulations from inimies because Indonesia had killed many persons indirectly and directly. So far today, he killed already 250 thousands Timorese. Therefore, those news can be false and can be the truth news according with what we passed during our inquiries and in the prison or in East Timor's prison and jakarta's prison.

10 Also some citizens who had the knowledges of historical world in relation of indonesian histories. Sometimes, in the meeting, they always imposed the opinion of Indonesian government, those persons were imediately surpected and persecuted. When they felt themselves sick; They went to submet medical consult. There, the indonesian doctors had got already the informations. They were going to give medical advice, at the end, they said that the paticnt was with the perse of water into the lungs It's necessary extract out the liquid to not breed The pulmanary Tomour. And then they began to ask the sick and his families. If the families and the sick accepted the bands of them, They went to drill the lungs of the patient. The lungs were perforated without efficacious treatment and with the advance of time, the illness increased and became grave, The sick weakened and he had been dead at the end Seeh as the male nurse Domingos Belo, HR Fernandes Santos Silva, etc.

11 Some Timorens were high officers of indonesia and They were dead indirectly by indonesian men. Some of them were the following valid men: Mario Sanches, administrator of Dili, José Raimundo Sarments, administrator of Dili, Angelino Piedade, subchief of Meterology João Martins, directer of Services of Education and

6

culture. They were dead indirectly to have defended the truth of humanity.

2. What will do for Xanana Gusmão who is direct iniimy or true iniimy of Indonesia and leader of national Resistence of East Timor. Other men were not inimies and they were officers of Indonesia. When they suspected them for something, they were dead, there wasn't pardon. Therefore, Indonesia was very bored with Xanana's statement that he wanted to be portuguese citizen and he didn't like to be citizen. Xanana Gusmão didn't recognize integration ~~of~~ East Timor into the Republic of Indonesia and he did survive East Timorese into the Court. Therefore, Indonesia can meithink for Xanana's life. Indonesia can prison him indirectly like Indonesian forces did for us in the prison before. Xanana wanted to avoid to eat the food from the prison. He wanted to eat the food from his family or from international Red Cross. Xanana is afraid with the threat of indirect death, because there was the occured concreted facts with other Timoreses. But, we go to see, if in reality, he is in strike of hungry. we got already the news from there that Xanana didn't have the meals and didn't receive the International Red Cross so far today.

3. we must believe the news according with our experience which we were acessed many years in ~~*~~ indonesian prison. The prevision of banishing of Xanana to Buro Island, we can believe also because Indonesia banished already some political prisoners of 12-11-1991 to that Island and two or three peoples to Lipinang's prison.

By these reasons, we are very busy with the Resistence leader's life, Xanana Gusmão, all Timoreses in Portugal appeal to European Comunity, to UNO, USA, HRO, IRC and International solidarities with Portuguese government so that intervene

and press Indonesian Government to respect Xanana life and to release him with all political prisoners. We hope that UNO, USA and Occidental Potences go to press Indonesian Government to allow internati- nal organizations to East Timor, because East Timor p want to be helpped by those organizations and Indone- nest respect the resolutions of United Nations. He is obliged to respect the rights of self-determination and the Indipendence of East Timor.

To finalize, we hope that the international world must veil the reason of struggle of East Timor's peop

Vive East Timor, vive UNO, vive EC, vive Portuga
vive National unity and vive International soli- darities.
